SUMMARY

Full-Stack AI / LLM Application Engineer who ships production features on top of foundation models — RAG systems, multi-agent LLM pipelines, and workflow automation — and builds the full product around them with Next.js, FastAPI and Laravel. Hands-on with custom hybrid-retrieval RAG, document-intelligence pipelines, vector search (pgvector), prompt engineering, and end-to-end deployment on Vercel and Render.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript, PHP, SQL, HTML/CSS
- **AI / LLM:** RAG (hybrid retrieval + reranking), LLM orchestration, multi-agent systems, prompt engineering, embeddings & pgvector, DeepSeek / Gemini / Qwen, Hugging Face, MinerU
- **Frameworks:** Next.js, React, FastAPI, Laravel, Node.js, Tailwind CSS
- **Data & Infra:** Supabase (Postgres / pgvector), MariaDB / MySQL, Neo4j, Docker, Vercel, Render
- **Automation & Tools:** n8n, Puppeteer, Playwright, Git / GitHub, REST APIs, SSE streaming

EXPERIENCE

- **Triz Innovation Pvt. Ltd.** Surat, India
Full-Stack AI Engineer (Intern → Full-Time) Dec 2025 – Present
 - **AI Advisory Chatbot (RAG):** Built a production insurance/finance advisory chatbot end-to-end on FastAPI + Supabase (Postgres/pgvector): custom hybrid retrieval (vector + keyword + heuristic reranking with confidence gating), SSE token streaming, session memory, and an IRDAI compliance / legal-knowledge layer, with a Next.js frontend.
 - **Multi-Agent Document Intelligence:** Engineered an NCERT PDF extraction and semantic-intelligence platform: a MinerU extraction microservice plus a 3-agent LLM pipeline (cognitive, pedagogy, assessment) generating a 13-dimension concept schema via DeepSeek, with SHA-256 caching and async concurrency; FastAPI + Next.js + React Flow.
 - **LLM-Powered LMS Features:** Implemented concept-wise question and assessment-rubric generation for a Laravel + Next.js K-12 LMS, grounded in stored semantic-intelligence and the CBSE framework through an OpenAI-compatible DeepSeek service.
 - **Workflow Automation:** Designed and deployed 15+ n8n automation workflows (AI social posting, SEO blog generation, MariaDB-Neo4j sync, task classification) plus supporting Node.js/Puppeteer rendering and a Playwright LinkedIn-analytics service with a Supabase + Recharts dashboard.
 - **Full-Stack Product Frontends:** Built Next.js/React frontends for corporate and K-12 ERPs and marketing sites — a 48-route corporate marketing site, module dashboards, an in-product chatbot UI with Web Speech voice-to-text, and a shared design system.
- **BrainyBeam Technologies** Ahmedabad, India
Machine Learning & Data Analysis Intern May 2025 – July 2025
 - **Machine Learning & Data Analysis:** Worked on machine-learning and data-analysis tasks in Python — data cleaning and preprocessing, exploratory analysis, and model building/evaluation.
- **Agevole Innovation** Surat, India
Web Developer Intern May 2024 – June 2024
 - **Web Development:** Built and maintained responsive web interfaces and integrated frontend components with backend REST APIs.

PROJECTS

- **InsureTech RAG Chatbot** [Github](#)
Full-stack insurance / finance advisory RAG assistant — FastAPI + Supabase (Postgres/pgvector), custom hybrid retrieval with heuristic reranking & confidence gating, SSE token streaming, session memory, an IRDAI compliance / legal-knowledge layer, and a Next.js frontend.

- NCERT PDF Extraction + Semantic Intelligence** [Github](#)
 MinerU extraction microservice plus a 3-agent LLM pipeline (cognitive, pedagogy, assessment) generating a 13-dimension educational concept schema via DeepSeek; FastAPI + Next.js + React Flow, with SHA-256 caching and async concurrency.
- K-12 LMS + PAL Platform** [Live Demo](#)
 Laravel + Next.js learning platform — LLM-driven concept-wise question & assessment-rubric generation, lesson-plan and curriculum intelligence, and an adaptive PAL loop (exam → misconception → remediation) grounded in the CBSE framework.
- K-12 ERP Design System** Documented, reusable design system — CSS design tokens, guideline cards and a custom component library.
- HR Template Engine (Canva-style Editor)** [Live Demo](#)
 Drag-and-drop HR document editor with a Craft.js layout engine, Tiptap rich text, a 10-type block system (text, image, table, grid, shape, etc.) and JSON-serialized templates; Next.js, deployed on Vercel.
- Corporate ERP Frontend (Workforce & Competency)** [Live Demo](#)
 Next.js ERP frontend — employee directory, competency, task, talent and learning modules served via a dynamic module router, with an AI intelligence-layer (Module Pulse / Awareness → Attention → Action) UX pattern.
- In-Product ERP Chatbot** Conversational assistant component (~4.7k LOC) with browser Web Speech API voice-to-text input.
- n8n Automation Suite (16 workflows)** Designed, built and deployed a suite of production n8n automation workflows: (1) L1 Support Automation, (2) HR Onboarding Automation, (3) Sales Lead Management Automation, (4) Project Management Automation, (5) Customer Feedback Automation, (6) Employee Training Automation, (7) Marketing Campaign Automation, (8) HR Recruitment Automation, (9) Sales CRM Automation, (10) Project Collaboration Automation, (11) Customer Service Automation, (12) HR Performance Management Automation, (13) Sales Forecasting Automation, (14) Project Resource Management Automation, (15) Customer Retention Automation, (16) HR Compliance Automation.
- AI Infographic Renderer Service** [Github](#)
 Node.js / Express + Puppeteer service exposing a /render endpoint that converts HTML/CSS templates into PNG infographics for the automation pipeline; deployed on Vercel.
- LinkedIn Analytics Dashboard** [Github](#)
 Playwright session-based scraper that stores per-post engagement metrics (likes, comments, impressions) in Supabase, surfaced on a real-time Next.js + Recharts dashboard.
- Triz Higher-Education Website** [Live Demo](#)
 Next.js marketing site (23 routes, 85 components) with SEO-optimized content and a dynamic blog served from an ERP Blog API.
- GapstoGrowth Corporate Website** [Live Demo](#)
 Next.js corporate marketing site (48 routes, 225 components) — product-solution pages, dynamic blog, SEO schema, and a Spline-based 3D hero.

EDUCATION

- Charotar University of Science and Technology (CHARUSAT)** Anand, Gujarat
B.Tech in Computer Engineering 2022 – 2026
- Ashadeep IIT** Surat, Gujarat
Higher Secondary (12th), Science
